

Visions of the Universe - Quilting Contest Winners

Four hundred years ago Galileo Galilei, with the telescope, advanced mankind's discovery and understanding of the cosmos. The past four centuries of discovery will be celebrated this year with a traveling exhibit. Boone County Library is one of forty libraries in the U.S. to house the exhibit through March 25. This is part of the global celebration of the International Year of Astronomy.

The exhibit at the library is entitled "Visions of the Universe: Four Centuries of Discovery". Drawings and images depict the salient features during this 400 years that have led to our present level of knowledge.

In conjunction with this exhibit, FOL has funded prizes for a competition in stellar quilt design and fabrication. The first results are depicted here.

1st Place Winner Georgia Cartwright
Small Quilt Category
Under 60 Age Group

People's Choice

The official judges have voted and now it's our turn. Stop by the library to cast your ballot for your favorite quilt or wall hanging. A special People's Choice ribbon will be awarded at the end of March.

Please, one vote per person.
