Portraits of Nature

Published in 1967, this book contains beautiful wildlife reproductions by the artist James Lockhart. Although the cover is not in good shape, the prints are in excellent condition. Ten prints, which have been glued to the paper, are scattered among the script. Following that are twenty-four prints, each of which is suitable for framing. Included are pictures of bobcat, beaver, Canada goose, pheasant, and an eagle about to catch a rabbit. The prints are 12 ½" by 15" and, once framed, would make beautiful and unique wall art. They must be seen to be appreciated.

In addition to *Portraits of Nature*, the book sale will have a large selection of science fiction paperbacks and a great variety of gardening books which include:

Greenhouses

Best Trees

Theme Gardens

Nature Friendly Gardens
